

Sign Documents Quickly & Securely

Net Health's Physician eSignature product – CliniSign – provides both you and your physicians the ability to go paperless and keep your therapy company compliant with documents requiring a signature. The centralized portal makes it easy for physicians to sign in from anywhere, on virtually any device, giving them the mobility they need to be available for patients — not paperwork.

Everyone Benefits from Using CliniSign

Therapy Providers

- Reduce compliance risk with e-signed documents stored directly in the EHR
- Increase clinician satisfaction via a streamlined workflow that automatically sends documents to clinicians and physicians upon e-signature
- Save money by going paperless and eliminating the need to print and store paper documents
- Free clinicians to focus on patients by removing the need to track documents and constantly chase down physicians for signatures
- Proven to reduce days to signature by 76% when using our e-faxing capability

Physicians

- Enjoy mobility by viewing and signing documents from your smart phone, tablet or desktop
- Eliminate the inconvenience of signing into different systems with easy, centralized access to all documents for all your patients, regardless of facility
- Save time by avoiding the need to re-sign old documents during therapy audits
- Get started right away with enrollment that's easy as 1, 2, 3!

CliniSign has helped us tremendously in meeting our goal to be 100% paperless and 100% compliant!"
